

Hatim Rehmanjee

Abu Dhabi, United Arab Emirates | hrehmanjee@icloud.com | +971-567-465-287 | [My Website](#) | [LinkedIN](#) | [GitHub](#)

Education

New York University, BSc. Major in Computer Science, Minors in Mathematics and Economics Aug 2022 – May 2026

- **GPA:** 3.95/4.0 ([transcript](#)) | **Honors:** 100% Scholarship
- **Coursework:** Machine Learning, Predictive Analytics, Reasoning in LLMs, Linear Algebra, Probability and Statistics, Algorithms, Data Structures, Operating Systems, Software Engineering, Asset Pricing
- **Key Experiences:** Study-away in NYC and Paris; coursework in Nairobi and Buenos Aires

Association of Chartered Certified Accountants (ACCA) Sept 2021 - ongoing

- **Coursework:** Financial Management, Performance Management, Audit and Assurance, Financial Reporting, Tax, Law
- Completed 9 out of 13 examinations (completely self-studied)

Industry Experience

Data Science Intern, OCTAVE (John Keells Group) – Colombo, Sri Lanka May 2025 – August 2025

- Designed a data pipeline analyzing transaction and customer data to deliver performance insights for supermarket expansion into new regions.
- Improved seasonal demand forecasting accuracy by 5% on average across key metrics (MAPE, RMSE)
- Gathered requirements using Agile methodology and redesigned PowerBI dashboards for supply chain analytics
- Developed a machine learning model using stock-outs to identify product substitutes, improving inventory recommendations.

Quantitative Finance Intern, Acuity Knowledge Partners – Colombo, Sri Lanka June 2024 - Aug 2024

- Developed and presented a quantitative trading strategy for hold/buy/sell decisions to senior management
- Implemented time series forecasting and hypothesis testing frameworks across equity and fixed income asset classes
- Built a trading analysis tool incorporating LSTM, Brownian Motion, ARIMA, and Markowitz portfolio optimization models

Data Analyst Intern, PwC – Colombo, Sri Lanka June 2023 - Aug 2023

- Analyzed timesheet and rate card data to identify productivity optimization opportunities, presenting recommendations to management
- Researched AI-assisted decision-making frameworks, like Delphi methodology, for integration into advisory services

Corporate Finance Intern, KPMG – Colombo, Sri Lanka July 2021 – Feb 2022

- Completed feasibility analysis for fertilizer plant expansion amid regulatory uncertainty in Sri Lanka's agricultural sector
- Supported M&A advisory for microfinance clients and manufacturing sector investment opportunities
- Performed company valuations using DCF, CAPM, and comparable company analysis for new venture assessments
- Conducted market and industry research to support client facing projects

Research Experience

Computer Science Capstone Project, New York University Abu Dhabi – Abu Dhabi, UAE August 2025 - Present

- Building [packDB](#), an open-source database system that integrates ILP solvers directly into SQL to solve package queries.
- Implementing support for new syntax based on the PaQL language developed by my advisor, Prof. Azza Abouzeid.
- Developed a website to showcase the first Beta. Check it out by clicking [here](#)!

Economics Student Assistant, New York University Abu Dhabi – Abu Dhabi, UAE June 2025 - Present

- Research assistant under Prof. Christian Haefke on market microstructure and liquidity dynamics
- Optimized Stata pipelines by migrating to Python with vectorized and parallel operations, reducing runtime by over 50%
- Computed high-frequency liquidity measures across 8TB of order book data from DAX for market quality analysis

Directed Study: Reasoning in Large Language Models, New York University Abu Dhabi Jan 2025 - Present

- Independent study under Prof. Saurabh Ray investigating reinforcement learning approaches to improve reasoning capabilities in LLMs

Efficient Compilers Research Assistant, New York University Abu Dhabi – Abu Dhabi, UAE Sep 2023 - May 2024

- Conducted comparative performance analysis of GCC, Clang, python, and jdk across diverse algorithmic workloads
- Analyzed compiler optimization effectiveness over multiple versions, identifying performance regressions and improvements

Projects

Personal Finance Planner GitHub	2025
- Engineered a terminal-based, privacy focused finance application using Python’s Textual framework and SQLite backend - Implemented rigorous double-entry bookkeeping with automated reconciliation, and P&L / Balance Sheet generation.	
F125 game: setup analysis GitHub	2025
- Engineered a data pipeline scraping 1000+ F1 car setup configurations and lap times across 24 tracks - Applied dimensionality reduction (PCA, t-SNE) and K-Means clustering to identify distinct "setup philosophies" - Quantified setup parameter sensitivity using Random Forest models, calculating lap time deltas per adjustment	
Algorithmic Bitcoin Trading Strategy GitHub , Presentation	2025
- Developed a directional trading strategy using fair value gaps and support/resistance levels for Bitcoin futures - Backtested on 10 years of historical data, achieving 21.56% buy-and-hold with 33.58% lower maximum drawdown.	

Volunteering and Leadership

Sponsorship Associate , Student Energy Summit 2023 – Abu Dhabi, UAE	Sep 2022 – Nov 2023
Secured \$500,000+ in corporate sponsorships for the world’s largest student-led sustainable energy conference	
Founding Treasurer , Sri Lankan Students Association – NYU Abu Dhabi, UAE	Jan 2023 – June 2023
Established financial operations and organized cultural events for newly formed student organization	
National-Level Athlete , Rowing – Sri Lanka	2015 – 2021
Earned 2 gold and 1 bronze medal in national competition; served as team vice-captain	

Skills

Programming Languages: Python, SQL, C++ , R, Stata
Data Science & ML: Scikit-learn, Pandas, NumPy, PySpark, TensorFlow, PyTorch, Statistical Modeling
Databases & Tools: PostgreSQL, SQLite, DuckDB, SQLAlchemy, Azure Databricks, Git
Visualization & BI: PowerBI, Matplotlib, Seaborn, Tableau
Web & Frameworks: React, Flask, FastAPI, REST APIs
Languages: Native: English, Gujarati, Sinhala | Conversational: Hindi, Urdu, French
